

## Ipreo's BuysideIQ targeting solution is now fully integrated into the BD Corporate IR workflow platform

### The Solution

BuysideIQ is a quantitative web-based investor targeting solution designed to accurately match issuers with qualified institutional portfolios (firms and funds). We analyze the investment strategies of over 35,000 global institutional portfolios, then rank them according to how well they fit your company's current investment profile in order to answer a simple question: *which portfolios are the best candidates to own your stock?*

Our online investor targeting product enables clients to:

- z Proactively target investors
- z Improve the productivity of sell-side sponsored events
- z Learn more about existing investors
- z Get quick background on an incoming call

### Quick facts

- z Accurate – our model is back-tested for every client
- z Flexible – users have the ability to fine tune results
- z Transparent – see the portfolio's construction and how you fit within it
- z Customizable – incorporate non-GAAP and proforma measures
- z Global – works for all issuers in all markets
- z Actionable – fully integrated with BD Corporate's global institutional contact and ownership data

The screenshot displays the BuysideIQ targeting interface with the following sections:

With online targeting capabilities fully integrated into BD Corporate, clients have the ability to search for institutions and funds based on Suitability, Purchasing Power, Market Cap Exposure, Industry Exposure and Country Exposure

- z The BuysideIQ approach is the most comprehensive in the industry, employing a model that focuses predominantly on fundamental analysis instead of limited sector comparison techniques.
- z Using an array of growth, valuation, profitability and risk metrics, we isolate the portion of a portfolio that is "like" your company, then rank portfolios against each other on this basis to help you prioritize demands on your time.
- z High scoring portfolios, including most of your current owners, are simply those whose emphasis on growth, valuation, profitability, and risk are consistent with your company.
- z Ipreo's online targeting metrics are further enhanced with BD's unparalleled investor contact and profile data.

Displaying 120 Institutions/Funds

BD Institution Name	Fund Name	Inst/Fund	Asset Class	Suitability	Normal Purchasing Power Value (USD,mm)	Normal Purchasing Power Shares	Country Exposure
