

### Ipreo identifies and communicates with your fixed income holders

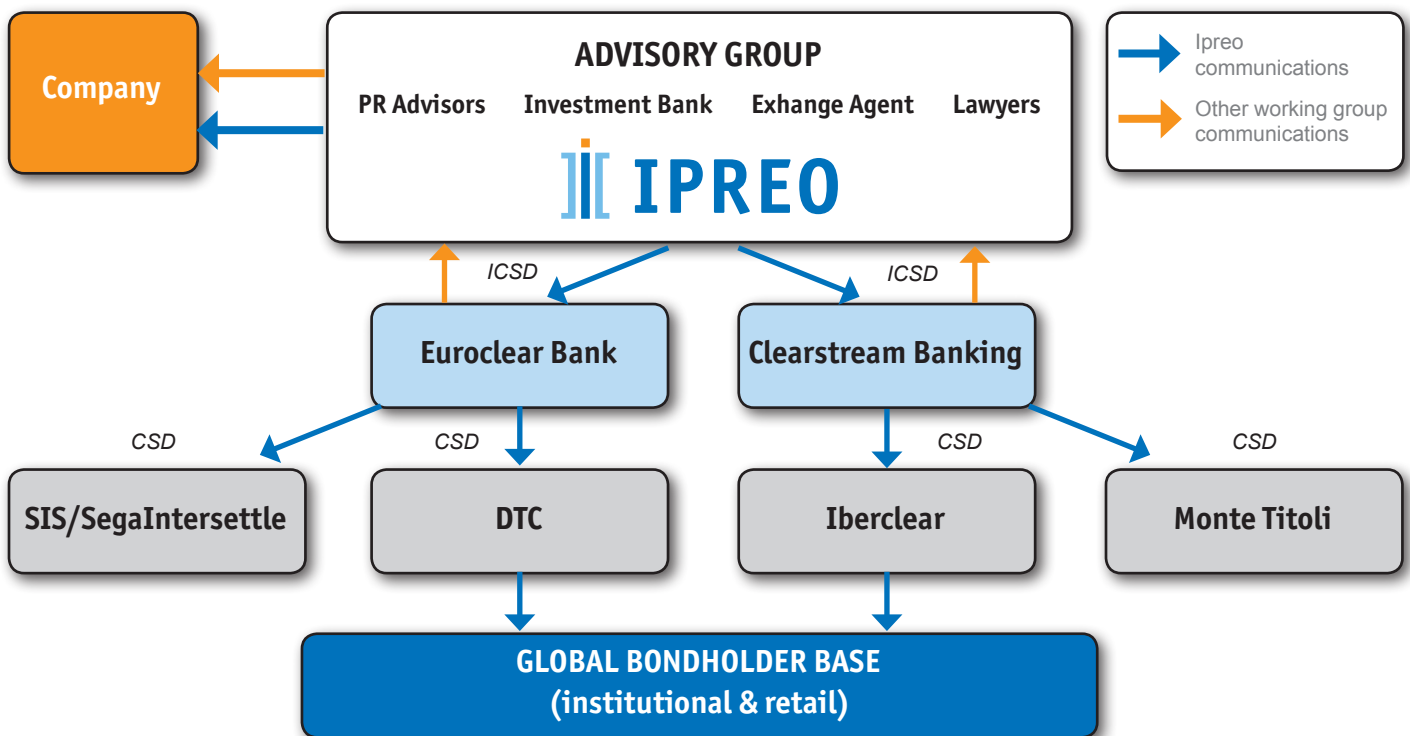

#### Why Ipreo

- z The vast majority of debt issuance worldwide goes through the Ipreo web-based deal management systems meaning that Ipreo has a unique view of entities and demand in the Fixed Income space.
- z Ipreo's BD Corporate platform has profiles on all major global bond investors including 20,000 portfolio managers and analysts.
- z The combination of the Fixed Income Identification team and the Bigdough entity research team means we can have two major teams working in tandem to identify and profile new investors overnight: we will not just give you a list at firm level of who owns the bond, we can provide contacts, address details and profiles of your investors.
- z Ipreo's Issuer Services team utilise their relationships with your Bondholders in order to provide you with a strategic and effective communication campaign during a restructuring or similar transaction.

#### Quick facts

- z Comprehensive - We identify more than 90% of the bondholders for dollar-denominated and over 60% for Euro denominated debt.
- z Speed - We are sensitive to the time constraints that companies and their advisors face in restructuring situations.
- z Accuracy - Unlike other firms who specialize in the delivery of publicly available data, our approach is proprietary and research-based.
- z Experience - More than 20 years of experience in the bondholder and shareholder intelligence businesses.
- z Global Reach - Office locations in New York, Washington, London, Paris, Vienna, Hong Kong and Tokyo mean that we have a Fixed Income contacts team who manage a database of 20,000 Fixed Income investors worldwide.
